

Greek dairy gets heat from the sun

An Absolicon X10 PVT system produces both electricity and heat for operations at a Greek dairy.

The solar collector has been installed together with solar panels. The purchaser is Koukfarm, a large-scale, Greek agribusiness that manages both cows and

sheep to produce milk and cheese. The installation is a small test system.

INSTALLATION FACTS

Location: Koukfarm Greece
Number of solar collectors: 1
Size of installation: 10 m²
Mounting: roof installation
